FOR YOUR NEW HOME · FREE, NO ACCOUNT NEEDED

Your inspection report, turned into a plan

Three free tools from Spetz for the months after you move in: one sorts out what your report found, one keeps the house in shape, dated for your local weather, and one helps when something breaks.

1 · UPLOAD YOUR INSPECTION REPORT

Every finding, sorted into a fix list

- What to fix now, this season and later
- What you can do yourself, and which pro to call for the rest
- A link to the right free guide or calculator for each DIY fix

Your report is read once and never stored.

spetz.ai/apps/home-inspection-report/

2 · YOUR HOME'S UPKEEP, DATED

Every job your home needs, on the right week

Furnace filter, gutters, water heater, smoke alarms, outside faucets before the freeze: dated for your ZIP code's weather, in your calendar or by email.

3 · WHEN SOMETHING BREAKS

Send a photo, get the fix

Show it the leak, the crack or the thing that stopped working: it marks the likely cause on your photo, then gives the fix one step at a time, with the parts priced, or tells you which pro to call.

Also free on spetz.ai: freeze alerts for your pipes, and calculators for paint, tile, concrete, decks and more.
